METHOD-2: NASA's 60 - YEAR LUNI SOLAR CYCLE

NASA's Synodic Month is 29.53058885 days. NTY is obtained as 365.1949488 days.

Calculated from 12h, 48m, 3s on 29th Mar., CE 1987 UT or from 0 NSM.

The Jewish Messiah was Crucified on Monday at 9 AM on 29th June CE 33.

NSM (Satya Yuga)	N 742	Cycles	Year	M	D	H	M	S	DW	Days
0	0	0	3890468 BCE	Dec.	21	03	26	27	Sun.	0

Formula of the 30 - Year Cycle: 1 Cycle = 30 Luni Solar Years = 30 Tropical Years = 30 - Year Luni Solar Cycle = 30 - Year Tropical Cycle = 371 Synodic Months = 360 Tropical Months = 10,956 days.

Synodic Month = Days per 30 - Year Luni Solar Cycle ÷ Synodic Months per 30 - Year Luni Solar Cycle = 10,956 days ÷ 371 = 29.5309973 days (29 days, 12 hours, 44 minutes, and 38.16711744 seconds).

Tropical Year = Days per 30 - Year Tropical Cycle ÷ 30 Years = 10,956 days ÷ 30 = 365.2 days (365 days, 4 hours and 48 minutes). This Tropical Year is not equal to 365.2425 days.

Therefore, 30 - Year Cycle = 60 - Year Cycle = Inaccurate! See the 2nd page, right side.

The foolishness of Geologists, Archeologists, Astronomers, and Historians is that mankind lived beyond 25th Feb., 4234 BCE. Yahweh's Book recorded history from 4234 BCE to CE 100 with the evidence of Extra-Biblical sources. Please see the 261st page to the 284th page under "Jewish History" on our website. History speaks that the 4 Empires ruled the World. See 552nd page. See the Bronze Age from 345th to 352nd page. It is impossible to confirm any Historical date (Event) written in any Religious Book without proving the beginning of two consecutive 60-year luni-solar cycles. I have given those 2 Cycles, one at 47967332 HSM in 12292 BCE and the second at 47968074 HSM in 12232 BCE, because Dr. Nilesch Nilkant Oak calculated that Sri Rama's birth date is 29th November 12240 BCE. **All the calculations of Dr. N N O, Dr. P V Vartak, Sri Pushkar Bhatnagar, Dr. D K Hari, Dr. D K Hema Hari, Sri Saradh Uphadyay (Drikpanchang.com), Sri Nikhil Gupta, and so on were inaccurate because they didn't know the Hindu Luni Solar Cycle.** These so-called geniuses used NASA's Synodic Month with 29.53058885 days. What is the necessity to use NASA's Synodic Month to confirm the birth date of Sri Rama and Sri Krishna?

Research Again: (1) How can the Kali Yuga begin in 3102 BCE or 3105 BCE, or 3112 BCE if the 60 - Year Luni Solar Cycle began (Prabhava began) on 6 hours on 30th March AD/CE 1987? (2). Did the Satya Yuga begin at 6 hours (6 AM) or not? (3). Did the Treta Yuga, and the Dwapara Yuga begin after the end of the 60 - Year Luni Solar Cycle? (3). Please prove your calculations from Sataya Yuga or Treta Yuga or Dwapara Yuga, or Kali Yuga to confirm the beginning of Prabhava in AD/CE 1987? (4). How long is a Hindu Synodic Month (29.5309973 days or 29.53058885 days) and a Hindu Tropical Year (365.2 days or 365.2425 days)? (5). Prove the formula of the Hindu 60 - Year Luni Solar Cycle. Then we can believe your calculations. 'So-called geniuses didn't realize that the 30 - Year Luni Solar Cycle is repeating in the 60 - Year Luni Solar Cycle. Those who don't have a minimum knowledge of mathematics may believe all the fake calculations concerning the birth date of Sri Rama, Sri Krishna and other dates. Moreover, the Hindu 60 - Year Luni Solar Cycle or the 30 - Year Luni Solar Cycle had not been giving accurate Phases of the Moon, accurate Seasons and accurate Years (Ugadi). So, the 60 - Year Luni Solar Cycle is not determined by Brahma the Creator because it was inaccurate.

Therefore, the 60 - Year Luni Solar Cycle might be determined either by the Chinese or by Aryan Pandits before 1500 BCE.

Any history that is not based on the Universal Calendar Formula (49 - Year Cycle = Calendar) is fiction!

So, the Hindu 60 - Year Luni Solar Cycle was completed 84 times from the beginning of Kali Yuga to 6 hours on 30th March CE 1987.												Maargasira	47967378	Research: So-called geniuses (Dr. NNO, Dr. Pushkar Bhatnagar, Sri. Sarat Uphadayay, and all Panchang writers) have been misleading Hindus with inaccurate calculations. METHOD-2: NASA's 60 - YEAR LUNI SOLAR CYCLE

NASA's Synodic Month is 29.53058885 days. NTY is obtained as 365.1949488 days.

Calculated from 12h, 48m, 3s on 29th Mar., CE 1987 UT or from 0 NSM.

The Jewish Messiah was Crucified on Monday at 9 AM on 29th June CE 33.

49 YEARS IS THE FORMULA OF YAHWEH'S CALENDAR - Leviticus 25:8-9

Yahweh's Calendar Formula: 1 Cycle = 49 YEARS = 49 - Year Luni Solar Cycle = 49 - Year Tropical Cycle = 606 Yahweh's Synodic Months (YSM) = 588 Yahweh's Tropical Years (YTY) = 17,896 days = 17,896 days + 17,896 nights = Constant Forever = Leviticus 25:8-9; Jeremiah 33:19-26; 31:35-37; Psalms 104:19; John 11:9; Genesis 1:13-19.

Yahweh's Synodic Month (YSM) = Days completed per 49 - Year Luni Solar Cycle ÷ Synodic Months completed per 49 - Year Luni Solar Cycle = 17,896 days ÷ 606 = 29.53135314 days (29 days, 12 hours, 45 minutes and 8.91088992seconds).

Yahweh's Tropical Year (YTY) = Days completed per 49 - Year Luni Solar Cycle ÷ 49 Tropical Years = 17,896 days ÷ 49 = 365.2244898 days (365 days, 5 hours, 23 minutes and 15.9183744 seconds). Yahweh's Tropical Month (YTM) = YTY (Yahweh's Tropical Year) ÷ 12 = 30.43537415 days.

Luni Solar Difference Per Month (LSDPM) = YTM - YSM = 30.43537415 days - 29.53135314 days = 0.904021014 days. So, LSDPM = 0.904021014 days.

Research: It was observed that the "Extra Month" has been occurring at the end of every 33rd or 32nd Synodic Month because of LSDPM. All Panchang writers have been adding an Extra Month according to their will to cover their fake calculations. Similarly, astronomers of the IAU/NASA are covering up their inaccurate discoveries (Synodic Month with 29.53058885 days and Tropical Year with 365.2422 days). So, day and night, Phases of the Moon, Seasons, and Years have not been occurring according to the Hindu 60 - Year Cycle but according to the 49 - Year Cycle (Leviticus 25:8-9). Some so-called geniuses calculated the inaccurate date of birth of Sri Rama and Sri Krishna, which has been misleading Hindus to this very day. That's why I disproved all the miscalculations of these so-called geniuses and NASA/IAU.

Research Again: This is the time to research again with the help of M S Office Excel, Scientific calculations, Astropixels Calendar Date converter, and the proof of the Bronze Age to confirm the dates of birth and death of Lord Jesus Christ, Lord Rama, and Lord Krishna. There was no proof of metal and alloy beyond 4000 BCE. The Jewish Messiah (Yahshua the Messiah or Jesus Christ) was born after 4234 Luni Solar Years, and Jesus Christ was crucified after 4266 Luni Solar Years is proven historically and Astronomically. For the complete picture of Jewish History and Yahweh's Clock, see the 110th page under Jewish History and the 794th page under Yahweh's Clock on www.yhwhcalendar49.com. Similarly, the Hindu Calendar should satisfy Hindu History from the Satya Yuga.

47967450	118	WHERE IS HISTORICAL EVIDENCE OF HINDU HISTORY FROM THE BEGINNING?												Ashvina	47967450	Research Again: If mankind had been living since the Satya Yuga (19th Feb., 3890521 BCE), then there should be more development in each country. And India should be in the top position. The USA and all English people are the tribe of Manasseh and Ephraim (Genesis 28:14; 48:1-20; 49:22-26; Deut. 33:13-17). Israel can defeat the World in the days to come (Zechariah 12:1-7; Genesis 22:17). For more information, study under (1). HISTORICAL EVENTS IN YAHWEH'S BOOK AND (2). THE DISCOVERIES OF ASTRONOMERS (NASA OR IAU ETC.) HAVE BEEN MISLEADING THE WORLD - 1" on our website. After the end of 4233 Luni Solar Years, in the reign of Julius Caesar, the Jewish Messiah (Yahweh, the Creator) was born on 10th Nov., 1 BCE (Wed.) at 9 PM on the Full Moon Day in the feast of Sukkoth (Luke 2:1-7). This event was prophesied between 779 BCE and 718 BCE in Isaiah 7:14; Micah 5:1-2; Numbers 24:17 (1579 BCE and 1577 BCE) and so on. 4 Empires was Prophecised in 625 BCE (Daniel 2:1-49). The 4th Beast (The Roman Empire) will rule the World AGAIN is Prophecised in 625 BCE (Daniel 2:44; Revelation 13;1-18). Yahweh determined the 49 YEARS (49 - Year Luni Solar Cycle = 49 Year Tropical Cycle = Leviticus 25:8-9; Genesis 1:13-19; Psalms 104:19; John 11:9; Jeremiah 33:19-26) to give Nights, days, Phases of the Moon, Seasons, and Years. Yahweh created the Sun, Moon, and stars strictly at 18 hours on 23rd Feb., 4234 BCE (Genesis 1:1-19).

DATE OF BIRTH OF LORD RAMA, LORD KRISHNA, LORD JESUS CHRIST AND THE DEATH OF LORD KRISHNA AND LORD JESUS

METHOD-1: HINDU 60 - YEAR LUNI SOLAR CYCLE

Calculated from 6 hours on 30th Mar., CE 1987 or 0 HSM at 82.5°E, Mirzapur, IST.

The Jewish Messiah was Crucified on Monday at 9 AM on CE 33.

47967514	182	Yahweh determined a Calendar Formula that the 49 Years = 49 Luni Solar Years = 49 – Year Luni Solar Cycle = 606 Synodic Months = 588 Tropical Months = 49 Tropical Years = 49 – Year Tropical Cycle = 17,896 days = 17,896 nights + 17,896 daytimes = Constant forever (Leviticus 25:8-9). So, Yahweh’s Synodic Month = 29.53135314 days (Days per Cycle ÷ Months per Cycle). Yahweh’s Tropical Year = 365.2244898 days (Days per Cycle ÷ Years per Cycle). So, the discoveries of Astronomers (Synodic Month as 29.53058885 days and Tropical Year as 365.2422 days) are inaccurate. I pinpointed that the Jewish Messiah was born in Israel in the Summer on 10th November 1 BC/BCE (Wednesday) by using Yahweh’s Calendar formula (49 Years – Leviticus 25:8-9).

47967527	47967527	According to Genesis 1:13-19; Psalms 104:19; 81:1-5, Yahweh's Tropical Year = 365.2244898 days (Days per Cycle ÷ Years per Cycle). So, Yahweh's Tropical Year takes 365.2244898 days, but not 365.2422 days (Discovered by NASA or IAU). That's why I pinpointed that the Jewish Messiah was born in Summer on 10th November 1 BC/BCE (Wed.), the Messiah was Crucified in the Winter in the flowering time strictly on 13th May CE 33 (Wednesday), and was resurrected on 16th May CE 33 (Sat.) in Winter by using Yahweh's Calendar formula (49 Years = 49 – Year Luni Solar Cycle = Leviticus 25:8-9).

Research Again: So-called geniuses failed to prove how to calculate the Phases of the Moon first, so how can they calculate the position of other planets and stars that are located beyond the Earth? So, it was clear that Astronomers and religious leaders have been misleading the people under the veil of Astronomy and the Creator. Everyone should compare the history and religious calendar formula written in each Religious Book to confirm the historical events written in each Religious Book. If any Religious Calendar formula gives accurate nights, accurate days, accurate Phases of the Moon, accurate Seasons, and accurate Year, then one can realize that such a calendar formula is determined by the true Creator.

Research: "Delta T" is useful to cover up the inaccurate discoveries (Synodic Month and Tropical Year) of Astronomers of NASA and IAU, just as all Religious Leaders are covering up their inaccurate calculations concerning the Phases of the Moon, Seasons, and Years. How can astronomers prove their discoveries are accurate, being their discoveries didn't prove the date of birth of Jesus Christ and the date of the Crucifixion of Jesus Christ with the help of the History recorded in Yahweh's Book. For a piece of evidence, please study under "JEWISH HISTORY" and under THE DISCOVERIES OF ASTRONOMERS (NASA OR IAU ETC.) HAVE BEEN MISLEADING THE WORLD - 1" and THE DISCOVERIES OF ASTRONOMERS (NASA OR IAU ETC.) HAVE BEEN MISLEADING THE WORLD - 1" on www.yhwhcalendar49.com.

Research: Those well-known so-called geniuses forgot the basics of Hindu Astronomy and Jewish Astronomy written in their Religious Books. That was the reason why these have been misleading and cheating the people under the veil of God and the Creator. My research has proven that all Astronomers and so-called geniuses have been misleading the people through fake astronomy and fake Calendars to this day. Hindus should use Brahma's Synodic Month (The Hindu Synodic Month with 29.5309973 days, Brahma's Tropical Year with 365.2 days), and Israelites should use Yahweh's Synodic Month with 29.53135314 days and Yahweh's Tropical Year with 365.2244898 days to confirm all the historical events. Please remember this forever!

| 64,647th time strictly at (3), and at the same time 47968074th NSM was completed. Dr. Nilesh Nilkanth Oak calculated an inaccurate date of birth of Sri Rama. Please see the 16th page. "Delta T" is the inaccurate concept to cover the mistakes or blunder of present Astronomers because we can't discover or confirm the birth of Jesus Christ (10th Nov., 1 BCE, the Crucifixion of Jesus Christ (13th May CE 33), the birth of Sri Rama and Sri Krishna. Hindu Calendar is not determined by Braham Bhogi, Sankranti and Pongal should not be celebrated in the January month because of inaccurate Hindu Tropical Year with 365.2 days. | | | | | | | | | | | | | |

Let's compare history and Prophecies written in other Religious books. (1). In the Book of Yahweh (Isaiah 34:16), history is written from the first man (4234 BCE) to CE 100. (2). 4 Empires in the World were written in between 625 BCE and 538 BCE. These fulfilled 626 BCE to CE 1798. (2). The Roman Empire will rule the World once again from CE 2132 to CE 2136 (Daniel 2:44; Revelation 13:1-18). (3). The Jewish Messiah (Jesus Christ) will come again and rule the World from CE 2136 to CE 3136. (4). Yahweh punished Israelis with slavery, famine, sword, captivity, and so on (Judges 2:1-5) from 1700 BCE to CE 2100. (5). Jewish Calendar formula is written as 49 Years (Leviticus 25:8-9). (6). Day and nights, Phases of the Moon, Seasons, and Years are occurring according to 49 Years (49-Year Luni Solar Cycle = Genesis 1:13-19; Psalms 104:19) but not according to 60-Year Luni Solar Cycle.

ACCORDING TO DR. P V VARATAK SRI RAMA WAS BORN ON 4TH DECEMBER 7323 BCE, BUT IT HAS NOT BEEN PROVEN ASTRONOMICALLY !

<https://anantahimalayas.blogspot.com/2013/10/astronomical-dating-of-ramayana.html>, <https://advocatanmoy.com/astronomical-dating-of-the-ramayan/>, <http://wiki.saiha.com/saiha/html/index.cfm?ThreadID=76567>

CLUE: According to Dr. P V Vartak, Rama's birth is on November **4th, December 7323 BCE**, which happened between the 48028176th HSM and the 48028918th HSM. Julius Caesar proposed the Julian Calendar in 46 BCE, during that time, Ugadi occurred on 9th July 46 BCE (If NASA's Synodic Month is used) or 29th June 46 BCE (If Hindu Synodic Month is used) in India, and the Jewish Religious New Year (1st Abib) occurred on 22nd April 46 BCE in Israel. See under " THE DISCOVERIES OF ASTRONOMERS (NASA OR IAU ETC.) HAVE BEEN MISLEADING THE WORLD - 1" on our website.

48,028,177	1	Let's calculate the end of the 48,028,176th HSM and 48028918 HSM because Dr. P V Vartak calculated that Sri Rama was born on 4th Dec., 7323 BCE. We can calculate from the beginning of Satya Yuga and from 30th March CE 1987 also. The Hindu 60 - Year Cycle was completed 64,884times strictly at 6 hours on 30th March CE 1987. The Hindu 60-Year Luni Solar Cycle was completed on 6 hours on 30th March CE 1987 is known to all Hindus. You can see the Pachangam. If any historical event written in any Religious Book was not proven Astronomically (Formula of the Luni Solar Calendar), then there is no need to consider such an event as genuine, and it doesn't belong to the true Creator.													Chaitra	Let's calculate the 64,728 Cycles (64728 X 742 = 48028176 NSM): 64728 Cycles X 21911.69693 days = 1,418,300,318.67 days.

48,028,187	11	Research: First, calculate the beginning of each Yuga. Then, it is easy to calculate from Satya Yuga. The Astropixels Calendar Date Converter is also useful from 4700 BCE.													Maagha	NSM (NASA's Synodic Month) = 29.53058885 days used. 48028176 NASA's Synodic Months = 48028176 NSM X 29.53058885 days = 1,418,300,318.67 days = 1,418,300,318 days, 16 hours, 4 min., and 48 sec. Calculate from Satya Yuga (21st Dec., 3890468 BCE) to 12th Aug., 7373 BCE: From 21st Dec., 3890468 BCE to 31st Dec., 3890465 BCE = 0,000,001,106 days From 31st Dec., 3890465 BCE to 31st Dec., 7377 BCE = 1,418,297,892 days (3883088 Years X 365.25) From 31st Dec., 7377 BCE to 31st Dec., 7374 BCE = 0,000,001,095 days From 31st Dec., 7374 BCE to 12th Aug., 7373 BCE = 0.000,000,225 days From 21st Dec., 3890468 BCE to 12th Aug., 7373 BCE = 1,418,300,318 days

48,028,197	21	Let's calculate for 1,418,319,936 days from Satya Yuga (19th Feb., 3890521 BCE) to 28th Feb., 7373 From 19th Feb., 3890521 BCE to 31st Dec., 3890521 BCE = 0,000,000,316 days From 31st Dec., 3890521 BCE to 31st Dec., 7377 BCE (3883144 Years) 1,418,318,346 days From 31st Dec., 7377 BCE to 31st Dec., 7374 BCE = 0,000,001,095 days From 31st Dec., 7374 BCE to 28th June., 7373 BCE = 0,000,000,179 days From 6 AM on 19th Feb., 3890521 BCE to 6 AM on 28th Feb., 7373 BCE 1,418,319,936 days So, 1,418,319,936 days are there from Satya Yuga to the end of the 64,728th 60 - Year Cycle.													Maargasira	According to Method-2, 48028176 NASA's Synodic Months (64,728 Cycles = 64728 X 21911.69693 days) = 48028176 X 29.53058885 days = 1418,300,318 days, 16 hours, 4 minutes, and 48 seconds. 1418300318 days are there between (1) and (2). <table><tr><td>Year</td><td>Month</td><td>Day</td><td>H</td><td>M</td><td>S</td><td>NSM</td><td>Case</td></tr><tr><td>3890468 BCE</td><td>Dec.</td><td>21</td><td>03</td><td>26</td><td>27</td><td>0</td><td>(1)</td></tr><tr><td>7373 BCE</td><td>Aug.</td><td>12</td><td>03</td><td>26</td><td>27</td><td></td><td>(2)</td></tr></table> Let's add 16 hours, 4 minutes, and 48 seconds to (2) to get the end of 48028176th NSM because there was a residue of 48028176th NSM. <table><tr><td>Year</td><td>Month</td><td>Day</td><td>H</td><td>M</td><td>S</td><td>NSM</td><td>Case</td></tr><tr><td>7373 BCE</td><td>Aug.</td><td>12</td><td>03</td><td>26</td><td>27</td><td></td><td>(2)</td></tr><tr><td></td><td></td><td></td><td>16</td><td>04</td><td>48</td><td></td><td></td></tr><tr><td>7373 BCE</td><td>Aug.</td><td>12</td><td>19</td><td>30</td><td>75</td><td></td><td></td></tr><tr><td>7373 BCE</td><td>Aug.</td><td>12</td><td>19</td><td>31</td><td>15</td><td>48028716</td><td>(3)</td></tr></table> Research: According to Method-2, 48028176 NASA's Synodic Months or the NASA's 60 - Year Luni Solar Cycle was completed 64,728 times strictly at (3). DATE OF BIRTH OF LORD RAMA, LORD KRISHNA, LORD JESUS CHRIST AND THE DEATH OF LORD KRISHNA AND LORD JESUS

METHOD-1: HINDU 60 - YEAR LUNI SOLAR CYCLE

Hindu Synodic Month is 29.5309973 days. Hindu Tropical Year is obtained as 365.2 days from the 60 - Year Cycle.

Calculated from 6 hours on 30th Mar., CE 1987 or 0 HSM at 82.5°E, Mirzapur, IST.

The Jewish Messiah was Crucified on Monday at 9 AM on CE 33.

HSM (Satya Yuga)	H 742/ Year	Cycles	Tropical Years	LuniSolar Years	Divine Years	Days	Year	M	D	H	M	S	DW
0	0	0	0	0	0	0	38,90,521 BCE	Feb.	19	06	00	0	Sat.
48,028,770	594	Let's calculate the end of the 48028799th Hindu Synodic Month from Satya Yuga because Dr. P V Vartak calculated that Sri Rama was born on 4th Dec., 7323 BCE.											
48,028,771	595												
48,028,772	596												
48,028,773	597												
48,028,774	598	HSM (Hindu Synodic Month) = 29.5309973 days is used.											
48,028,775	599												
48,028,776	600												
48,028,777	601												
48,028,778	602	48028799 Hindu Synodic Months = 48028799 HSM X 29.5309973 days = 1,418,338,334.19 days = 1418338334 days, 4 hours, 33 minutes, and 36 seconds.											
48,028,779	603												
48,028,780	604												
48,028,781	605												
48,028,782	Rakshasa	1418338334 days are completed from 6 AM on 19th Feb., 3890521 BCE (Sat.) to 6 AM on 10th Nov., 7323 BCE (Wed.). Add the residue (04 hours, 33 min., and 36 sec., to (b) to get the end of 48028799th HSM.											
48,028,783	607												
48,028,784	608												
48,028,785	609												
48,028,786	610	Research: 11th Nov., 7323 BCE is the Phadyami of Bhadrapad Month. So, Sravan Month ended strictly at (c), and at the same time Bhadrapad began. Now, let's findout 1 Tithi.											
48,028,787	611												
48,028,788	612												
48,028,789	613												
48,028,790	614	30 Tithi = 29.5309973 days. So, 1 Tithi = 29.5309973 days ÷ 30 = 0.984366576 days or 23 hours, 37 min, and 29 sec.											
48,028,791	615												
48,028,792	616												
48,028,793	617

I calculated the above figures from the beginning of Satya Yuga (February 19, 3890521 BCE). We can calculate from 6 AM on 30th March CE 1987, also because the Hindu 60-year luni-solar cycle was completed 64884th times at 30th March CE 1987 (See the 48143928 HSM). So, many so-called geniuses have been misleading the people under the veil of Religion. So, Dr. N N Oak, Dr. PV Vartak, and all other geniuses have been misleading Hindus.

METHOD-2: NASA's 60 - YEAR LUNI SOLAR CYCLE

NASA's Synodic Month is 29.53058885 days. NTY is obtained as 365.1949488 days.

Calculated from 12h, 48m, 3s on 29th Mar., CE 1987 UT or from 0 NSM.

The Jewish Messiah was Crucified on Monday at 9 AM on 29th June CE 33.

Let's calculate the end of the 48028798th Hindu Synodic Month from Satya Yuga because Sri Rama's birth is on 4th Dec., 7323 BCE (Tue.).										
48,028,773	NSM (NASA's Synodic Month) = 29.53058885 days used.									
48,028,774	48028798 NASA's Synodic Months = 48028798 NSM X 29.53058885 days = 1,418,318,687.3 days

The Hindu 60-Year Luni Solar Cycle was completed on 6 hours on 30th March CE 1987 is known to all Hindus. You can see in the Pachangam if you doubted. If any historical event written in any Religious Book was not proven Astronomically (Formula of the Luni Solar Calendar and Tropical Calendar), then there is no need to consider such an event as genuine, and it doesn't belong to the true Creator. METHOD-1: HINDU 60 - YEAR LUNI SOLAR CYCLE

Hindu Synodic Month is 29.5309973 days. Hindu Tropical Year is obtained as 365.2 days from the 60 - Year Cycle.

Calculated from 6 hours on 30th Mar., CE 1987 or 0 HSM at 82.5°E, Mirzapur, IST.

The Jewish Messiah was Crucified on Monday at 9 AM on CE 33.

48,028,899	723	Research: First, calculate the beginning of each Yuga. The Astropixels Calendar Date Converter is also useful since 4700 BCE. We should all request that NASA extend the Astro Pixels Calendar Date Converter since 3890521 BCE. Then it is so easy to verify all historical events from the date of the Satya Yuga.

I have given those 2 Cycles, one at 48028176 HSM in 7373 BCE and the second at 48028918 HSM in 7313 BCE. A lie is the truth when people believe in any faith without reasoning. Please see the evidence at 48028799 HSM to confirm the calculations of Dr. P. V. Vartak, as Dr. PVV didn't calculate in the same manner as I did.

Dr. P. V. Vartak didn't know the formula of the Hindu Calendar Formula.

Satya Yuga = From 6 AM on 19th Feb., 3890521 BCE, (Sat.) to 6 AM on 2nd Aug., 2162758 BCE (Wed.) = 4,800 Divine Years = 28,800 Cycles = 21369600 Hindu Synodic Months = 1728000 Years = 631065600 days.

Treta Yuga = From 6 AM on 2nd Aug., 2162758 BCE (Wed.) to 6 AM on 4th Mar., 866935 BCE (Sat.) = 3,600 Divine Years = 21,600 Cycles = 16027200 Hindu Synodic Months = 1296000 Years = 473299200 days.

Dwapara Yuga = From 6 AM on 4th Mar., 866935 BCE (Sat.) to 6 AM on 24th Nov., 3054 BCE (Mon.) = 2,400 Divine Years = 14,400 Cycles = 10684800 Hindu Synodic Months = 864000 Years = 315532800 days.

Kali Yuga = From 6 AM on 24th Nov., 3054 BCE (Mon.) to 6 AM on 23rd Jul., CE 428897 (Tue.) = 1200 Divine Years = 7,200 Cycles = 5342400 Hindu Synodic Months = 432000 Years = 157766400 days.

Research Again : (1). All geniuses didn't know that the Hindu Synodic Month (29.5309973 days) is not equal to NASA's or IAU's Synodic Month (29.53058885 days). (2). What is the necessity to use NASA's or IAU's Synodic Month (29.53058885 days) to confirm the historical events written in Hindu Religious Books, such as the Geeta, Puranas, and so on? (3). How is it possible to celebrate Bhogi, Sankranti, and Pongal in January in each Year as the Hindu Tropical Year (365.2 days) is not equal to the Gregorian Tropical Year (365.2425 days)? (4). Have you ever realized that the 30-Year Luni Solar Cycle is repeating in the 60-Year Luni Solar Cycle?

METHOD-2: NASA's 60 - YEAR LUNI SOLAR CYCLE

NASA's Synodic Month is 29.53058885 days. NTY is obtained as 365.1949488 days.

Calculated from 12h, 48m, 3s on 29th Mar., CE 1987 UT or from 0 NSM.

The Jewish Messiah was Crucified on Monday at 9 AM on 29th June CE 33.

NSM (Satya Yuga)	N 742	Cycles	Year	M	D	H	M	S	DW	Days
0	0	0	3890468 BCE	Dec.	21	03	26	27	Sun.	0
Let's calculate the 64,729 Cycles (64729 X 742 = 48028918 NSM): 64729 Cycles X 21911.69693 days = 1,418,322,230.37 days.										
NSM (NASA's Synodic Month) = 29.53058885 days used.										
48028918 NASA's Synodic Months = 48028918 NSM X 29.53058885 days = 1,418,322,230.37 days = 1,418,322,230 days, 8 hours, 52 minutes, and 48 seconds.										
Calculate from Satya Yuga (21st Dec., 3890468 BCE) to 9th Aug., 7313 BCE:										
From 21st Dec., 3890468 BCE to 31st Dec., 3890465 BCE = 0,000,001,106 days										
From 31st Dec., 3890465 BCE to 31st Dec., 7317 BCE = 1,418,319,807 days (3883148 Years X 365.25)										
From 31st Dec., 7317 BCE to 31st Dec., 7314 BCE = 0,000,001,095 days										
From 31st Dec., 7314 BCE to 9th Aug., 7313 BCE = 0,000,000,222 days										
From 21st Dec., 3890468 BCE to 9th Aug., 7313 BCE = 1,418,322,230 days										
According to Method-2, 48028918 NASA's Synodic Months (64,729 Cycles = 64729 X 21911.69693 days) were completed between (1) and (2).

Kali Yuga began at 23h, 47m, 48.024s on 18th December 3054 BCE (Thu.).

This is the time to research and confirm every historical event with Astronomy!

Research Again: If Brahma determined the Hindu Synodic Month with 29.53058885 days, did you realize that the 60 Luni Solar Years = 60 - Year Luni Solar Cycle (742 X 29.53058885 days) = 21,911.69693 days = 21911 days, 16 hours, 43 minutes, and 34.46688 seconds = 21912 daytimes + 21911 nights + 21911th night ends up with 4 hours, 43 minutes, and 34.46688 seconds. So, it is observed that the 21912th night ends up with 4 hours, 43 minutes, and 34.46688 seconds is not possible scientifically. So, this is the time to research again.

ACCORDING TO SRI PUSHKAR BHATNAGAR SRI RAMA WAS BORN ON 10TH JANUARY 5114 BCE, BUT IT HAS NOT BEEN PROVEN ASTRONOMICALLY !

CLUE: According to Sri Pushkar Bhatnagar, Dr. D K Hari and Dr. D K Hema Hari, and Nikhil Gupta (om.nikhil.gupta@gmail.com) Sri Rama's birth is on **January 10th, December 5314 BCE**, which happened between the 48055630th HSM and the 48056372nd HSM. Julius Caesar proposed the Julian Calendar in 46 BCE, during that time, Ugadi occurred on 9th July 46 BCE (If NASA's Synodic Month is used) or 29th June 46 BCE (If Hindu Synodic Month is used) in India, and the Jewish Religious New Year (1st Abib) occurred on 22nd April 46 BCE in Israel. See under " THE DISCOVERIES OF ASTRONOMERS (NASA OR IAU ETC.) HAVE BEEN MISLEADING THE WORLD - 1" on our website.

48055631	1	Let's calculate the end of the 48,055,630th HSM because Sri Pushkar Bhatnagar calculated that Sri Rama was born on 10th Jan., 5114 BCE. We can calculate from the beginning of Satya Yuga and from 30th March CE 1987 also. The Hindu 60 - Year Cycle was completed 64,884times strictly at 6 hours on 30th March CE 1987, and it was known to all Hindus. You can see in the Pachangam if you doubt. If any historical event written in any Religious Book was not proven Astronomically (Formula of the Luni Solar Calendar and Tropical Calendar), then there is no need to consider such an event as genuine, and it doesn't belong to the true Creator. First, calculate the beginning of each Yuga. Then, it is easy to calculate from Satya Yuga. The Astropixels Calendar Date Converter is also useful from 4700 BCE.															Let's calculate the 64,765 Cycles (64765 X 742 = 48055630 NSM): 64765 Cycles X 21911.69693 days = 1,419,111,051.46 days.									
48055632	2	Let's calculate the 64,765 Cycles: 64765 Cycles X 21912 days = 1,419,130,680 days. Let's calculate for 1,419,130,680 days from Satya Yuga (19th Feb., 3890521 BCE) to 8th Mar., 5153 From 19th Feb., 3890521 BCE to 31st Dec., 3890521 BCE = 0,000,000,316 days From 31st Dec., 3890521 BCE to 31st Dec., 5157 BCE (3885364 Years) 1,419,129,201 days From 31st Dec., 5157 BCE to 31st Dec., 5154 BCE = 0,000,001,095 days From 31st Dec., 5154 BCE to 8th Mar., 5153 BCE = 0,000,000,068 days From 6 AM on 19th Feb., 3890521 BCE to 6 AM on 8th Mar., 5153 BCE <u>1,419,130,680 days</u> So, 1,419,130,680 days are completed from Satya Yuga to the end of the 64,765th 60 - Year Cycle. Research: It is impossible to confirm any Historical date (Event) written in any Religious Book without proving the beginning of two consecutive 60 - Year Luni Solar Cycle. I have given those 2 Cycles, one at 48055630 HSM in 5153 BCE and the second at 48056372 HSM in 5093 BCE. How can so-called geniuses claim their calculations were accurate without proving which Month is completed in the 60 - Year Luni Solar Cycle? The formula of the 60 - Year Cycle: 1 Cycle = 60 Years = 60 - Year Luni Solar Cycle = 60 - Year Tropical Cycle = 742 Synodic Months = 720 Tropical Months = 21,912 days = 21,912 nights + 21,912 days. The formula of the 30 - Year Cycle: 1 Cycle = 30 Years = 30 - Year Luni Solar Cycle = 30 - Year Tropical Cycle = 371 Synodic Months = 360 Tropical Months = 10,956 days = 10,956 nights + 10,956 days. Research: It was observed that the 60 - Year Luni Solar Cycle = 30 - Year Luni Solar Cycle.															NSM (NASA's Synodic Month) = 29.53058885 days used. 48055630 NASA's Synodic Months = 48055630 NSM X 29.53058885 days = 1,419,111,051.46 days = 1,419,111,051 days, 11 hours, 02 minutes, and 24 seconds. Calculate from Satya Yuga (21st Dec., 3890468 BCE) to 13th Apr.,5153 BCE: From 21st Dec., 3890468 BCE to 31st Dec., 3890465 BCE = 0,000,001,106 days From 31st Dec., 3890465 BCE to 31st Dec., 5157 BCE = 1,419,108,747 days (3885308 Years X 365.25) From 31st Dec., 5157 BCE to 31st Dec., 5154 BCE = 0,000,001,095 days From 31st Dec., 5154 BCE to 13th Apr., 5153 BCE = 0,000,000,103 days From 21st Dec., 3890468 BCE to 13th Apr., 5153 BCE = 1,419,111,051 days 1,419,111,051 days are completed between (1) and (2). Add 11 hours, 02 minutes, and 24 seconds to (2) to get the end of 48055630th NSM.

48055636	6																Let's add 11 hours, 02 minutes, and 24 seconds to (2) to get the end of 48055630th NSM because there was a residue of 48055630th NSM.

How can so-called geniuses claim their calculations were accurate without proving which Month is completed in the 60 - Year Luni Solar Cycle? The Hindu 60 - Year Luni Solar Cycle has not been giving accurate Phases of the Moon, accurate Seasons, and accurate Ugadi. Sri Pushkar Bhatnagar didn't prove his calculations just like me. So, the calculations of Sri P Bhatnagar are not accurate. Research: It was observed that the 60 - Year Luni Solar Cycle = 30 - Year Luni Solar Cycle.

48055666	36	According to Sri Nikhil Gupta (https://nikhilastroworld.com/2016/12/20/very-rare-astrological-birth-details-of-greatest-personalities/): Bhagwan Ram took birth on 10th Jan 5114 BC, at 10:14:54 am in Ayodhya, India and this would fall in Laghu Dwapar yuga under Brihat Dwapar yuga. This actually mean that in the span of thousands of years people have mistakenly assumed that lord Ram was born in Treta yug. This also mean that both Lord Ram and Lord Krishna took birth in the Brihat Dwapar yuga (though Laghu yugas were different)

DATE OF BIRTH OF LORD RAMA, LORD KRISHNA, LORD JESUS CHRIST AND THE DEATH OF LORD KRISHNA AND LORD JESUS

METHOD-1: HINDU 60 - YEAR LUNI SOLAR CYCLE

Hindu Synodic Month is 29.5309973 days. Hindu Tropical Year is obtained as 365.2 days from the 60 - Year Cycle.

Calculated from 6 hours on 30th Mar., CE 1987 or 0 HSM at 82.5°E, Mirzapur, IST.

The Jewish Messiah was Crucified on Monday at 9 AM on CE 33.

HSM (Satya Yuga)	H 742/ Year	Cycles	Tropical Years	LuniSolar Years	Divine Years	Days	Year	M	D	H	M	S	DW	
0	0	0	0	0	0	0	38,90,521 BCE	Feb.	19	06	00	0	Sat.	
48056096	According to Sri Pushkar Bhatnagar, 10th Jan., 5114 BCE is the birth date of Sri Rama. Let's calculate the end of the 48056110th Hindu Synodic Month from Satya Yuga. Sri P Bhatnagar didn't give evidence like me.													
48056097														
48056098														
48056099														
48056099	469	HSM (Hindu Synodic Month) = 29.5309973 days is used.												
48056100	Krodhi	48056110 Hindu Synodic Months = 48056110 X 29.5309973 days = 1,419,144,854.88 days =												
48056101	471	1419144854 days, 21 hours, 07 minutes, and 12 seconds.												
48056102	472	1419144854 days are completed from 6 AM on 19th Feb., 3890521 BCE (Sat.) to 6 AM on 28th Dec.,												
48056103	473	5115 BCE (Sun.). Add the residue (21 hours, 07 min., and 12 sec.,) to (b) to get the end of 48056110th												
48056104	474	HSM.												
48056105	475	Year	Month	Day	Hours	Minutes	Sec.	DW	Month					
48056106	476	3890521 BCE	Feb.	19	06	00	00	Sat.	(a)

48056108	478													
48056109	479

48056115	485	5115 BCE	Dec.	29	03	07	12	Mon.	Pausa	(c)				
48056116	486													
48056117	487	So, 29th Dec., 5115 BCE is the Phadyami of Maagha Month. So, Pausa Month ended strictly at (c), and												
48056118	488	at the same time Maagah began. Now, let's findout 1 Tithi.												
48056119	489	30 Tithi = 29.5309973 days.				So, 1 Tithi = 29.5309973 days ÷ 30 = 0.984366576 days or								
48056120	490	1 Tithi = How many days?				23 hours, 37 min, and 29 sec.								
48056121	491	13 Tithis = 13 X 0.984366576 days = 12.7967655 days = 12 days, 19 hours, 07 minutes, and 20.53908768												
48056122	492	seconds. Add 13 Tithis to (c) to get Rama's birth date to be 10th Jan., 5114 BCE (Sat.).												
48056123	493													
48056124	Parabhava	Year	Month	Day	Hours	Minutes	Sec.	DW	Month					
48056125	495	5115 BCE	Dec.	29	03	07	12	Mon.	Pausa	(c)				
48056126	496					+ 12	+ 19	+ 07	21					
48056127	497					41	22	14	33					
48056128	498	5114 BCE	Jan.	10	22	14	33	Sat.	Maagha	(d)				
48056129	499	Research Again: Sulka Paksha Trayodasi of Maagha ended strictly at (d). So, 10th Jan., 5114 BCE (Sat.)												
48056130	500	is not the Sukla Paksha Navami of Chaitra Month but is Sulka Paksha Trayodasi of Maagha. So, the												
48056131	501	calculations of Sri Pushkar have been misleading Hindus. So-called geniuses didn't prove their												
48056132	502	calculations as above. Cheating is so common in every Religion.												
48056133	503													
48056134	504	Please think once again: The Hindu 60 - Year Luni Solar Cycle is not determined by Brahma the												
48056135	505	Creator because the 30 - Year Luni Solar Cycle is repeating in the 60 - Year Cycle. Moreover, the Hindu												
48056136	506	Tropical Year is not suitable for getting accurate Seasons. That's why the Hindu Synodic Month is also												
48056137	Plavanga	not suitable for getting accurate Phases of the Moon, accurate Seasons, and accurate Ugadi.

METHOD-2: NASA's 60 - YEAR LUNI SOLAR CYCLE

NASA's Synodic Month is 29.53058885 days. NTY is obtained as 365.1949488 days.

Calculated from 12h, 48m, 3s on 29th Mar., CE 1987 UT or from 0 NSM.

The Jewish Messiah was Crucified on Monday at 9 AM on 29th June CE 33.

NSM (Satya Yuga)	N 742	Cycles	Year	M	D	H	M	S	DW	Days
0	0	0	3890468 BCE	Dec.	21	03	26	27	Sun.	0
Let's calculate the end of the 48056109th NASA's Synodic Month from Satya Yuga because Sri Pushkar calculated that Sri Rama was born on 10th Jan., 5114 BCE.										
NSM (NASA's Synodic Month) = 29.53058885 days used.										
48056109 NASA's Synodic Months = 48056109 NSM X 29.53058885 days = 1,419,125,196.61 days = 1,419,125,196 days, 14 hours, 38 minutes, and 24 seconds.										
Calculate from Satya Yuga (21st Dec., 3890468 BCE) to 3rd Jan.,5114 BCE:										
48056109 NASA's Synodic Months are there between (1) and (2).										
Year	Month	Day	H	M	S	NSM	Case			
3890468 BCE	Dec.	21	03	26	27	0	(1)			
5114 BCE	Jan.	03	18	04	51	48056109	(2)			
48056109	480	64765.6	5114 BCE	Jan.	03	18	04	51	1419125196.61	
From 21st Dec., 3890468 BCE to 31st Dec., 3890465 BCE = 0,000,001,106 days										
From 31st Dec., 3890465 BCE to 31st Dec., 5117 BCE = 1,419,123,357 days										
(3885348 Years X 365.25)										
From 31st Dec., 5317 BCE to 31st Dec., 5315 BCE = 0,000,000,730 days										
From 31st Dec., 5315 BCE to 3rd Jan., 5314 BCE = 0,000,000,003 days										
From 21st Dec., 3890468 BCE to 3rd Jan., 5314 BCE = 1,419,125,196 days										
1419125196 days = From 21st Dec., 3890468 BCE to 3rd Jan., 5314 BCE.										
Let's add 14 hours, 38 minutes, and 24 seconds to (2) to get the end of 48056109th NSM because there was a residue of 48056109th NSM.										
Year	Month	Day	H	M	S	NSM	Case			
5114 BCE	Jan.	03	03	26	27	-	(2)			
			14	38	24					
5114 BCE	Jan.	03	17	64	51	48056109	(3)			
So, 4th Jan., 5114 BCE is the Phadyami of Pausa Month. So, Margasira Month ended strictly at (3), and at the same time Pausa began.										
30 Tithi = 29.53058885 days. So, 1 Tithi = 29.53058885 days ÷ 30 = 0.984352961 days or 23 h, 37 m, 28 s.										
1 Tithi = How many days?										
0.984352961 days or 23 h, 37 m, 28 s.										
7 Tithis = 7 X 0.984352961 days = 6.890470732 days = 06 days, 21 hours, 22 minutes, and 16.67121636 seconds. Add 7 Tithis to (c) to get Rama's birth date.										
Year	Month	Day	H	M	S	Month	Case			
5114 BCE	Jan.	03	03	26	27	-	(2)			
			17	64	51					
5114 BCE	Jan.	10	15	27	08	Pausa	(3)			
Research: 10th Jan., 5114 BCE is not Sukla Paksha Navami of Chaitra but is Sulkan Paksha Sapmtami of Pausa Month. So, Sri. P Bhatnagar's calculations are fake.

48056354	724	Let's calculate the end of the 48056372nd Hindu Synodic Month from Satya Yuga because Sri Pushkar Bhatnagar calculated that Sri Rama was born on 10th Jan., 5114 BCE.													Ashvina	Let's calculate the end of 48056372 NSM because Sri Pushkar Bhatnagar calculated that Sri Rama was born on 10th Jan., 5114 BCE.											
48056355	725																										
48056356	726																										
48056357	727	48056372 Hindu Synodic Months = 48056372 HSM X 29.5309973 days = 1,419,152,592 days = 1,419,152,592 days. Calculate from Satya Yuga (19th Feb., 3890521 BCE) to 5th Mar., 5093 BCE: Calculate for 1,419,152,592 days from Satya Yuga (19th Feb., 3890521 BCE) to 5th Mar., 5093 BCE: From 19th Feb., 3890521 BCE to 31st Dec., 3890521 BCE = 0,000,000,316 days From 31st Dec., 3890521 BCE to 31st Dec., 5097 BCE (3885424 Years) 1,419,151,116 days From 31st Dec., 5097 BCE to 31st Dec., 5094 BCE = 0,000,001,095 days From 31st Dec., 5094 BCE to 5th Mar., 5093 BCE = 0,000,000,065 days From 6 AM on 19th Feb., 3890521 BCE to 6 AM on 5th Mar., 5093 BCE 1,419,152,592 days So, 1,419,152,592 days are there from Satya Yuga to the end of the 64,766th 60 - Year Cycle. 64767th Prabhava began at 6 hours on 5th March 5093 BCE. 1,419,152,592 days are completed between (a) and (b) because zero residue is remaining at the end of each Cycle, because HSM is suitable to get accurate nights (12 hours per night on the Equator) and days (12 hours per day on the Equator). So, the discoveries of IAU and NASA are not useful for obtaining accurate Phases of the Moon, accurate Seasons, and accurate Ugadi or New Year.													Pausa	NSM (NASA's Synodic Month) = 29.53058885 days used. 48056372 NASA's Synodic Months = 48056372 NSM X 29.53058885 days = 1,419,132,963.15 days = 1,419,132,963 days, 09 hours and 36 minutes,. Calculate from Satya Yuga (21st Dec., 3890468 BCE) to 9th Apr.,5093 BCE: From 21st Dec., 3890468 BCE to 31st Dec., 3890465 BCE = 0,000,001,106 days From 31st Dec., 3890465 BCE to 31st Dec., 5097 BCE (3885368 Years X 365.25) = 1,419,130,662 days From 31st Dec., 5097 BCE to 31st Dec., 5094 BCE = 0,000,001,095 days From 31st Dec., 5094 BCE to 9th Apr., 5093 BCE = 0.000,000,100 days From 21st Dec., 3890468 BCE to 9th Apr., 5093 BCE = 1,419,132,963 days 1,419,132,963 days = From 21st Dec., 3890468 BCE to 9th Apr., 5093 BCE. 1,419,132,963 days are completed between (1) and (2). Let's add 03 hours and 36 minutes to (2) to get the end of 48056372nd NSM. It was observed that the NSM is not useful for obtaining accurate Nights (12 hours) and days (12 hours) on the Equator because some residue remains at the end of each Cycle.

Research: What is the necessity to use NASA's or IAU's Synodic Month (29.53058885 days) instead of the Hindu Synodic Month (29.5309973 days) to confirm the historical events written in Hindu Religious Books, such as the Geeta, Puranas, and so on? NASA/IAU is using "Delta T". So, don't use NASA's data.		Year	Month	Day	Hours	Minutes	Sec. 		Research: (1). It was observed that the 30 - Year Luni Solar Cycle is repeating in the 60 - Year Luni Solar Cycle. (2). It is impossible to get Bhogi, Sankranti, and Kanuma on January Month because the Hindu Tropical Year (365.2 days) is not equal to the Gregorian Tropical Year (365.2425 days). (3). 29th June 46 BCE is Ugadi according to Method - 1 when Julius Caesar propoese the Julian Calendar in the Roman Empire. So, it was observed that the Hindu Calendar has not been giving accurate Seasons and accurate Ugadi when compared to Yahweh's Calendar based on the 49 - Year Luni Solar Cycle. 22nd April 46 BCE is New Year in Israel. 9th July 46 BCE is Ugadi according to Method - 2.										06	62	27													
64767th Prabhava began strictly at (3).										Research: It is impossible to confirm any Historical date (Event) written in any Religious Book without proving the beginning of two consecutive 60 - Year Luni Solar Cycle. I have given those 2 Cycles, one at 48055630 HSM in 5153 BCE and the second at 48056372 HSM in 5093 BCE.

ACCORDING TO SRI SHARAD UPADHYAY AND ARUN K BANSAL, SRI KRISHNA WAS BORN ON 19TH OR 20TH, OR 21ST JULY 3228 BCE, BUT THESE ARE FAKE

<https://www.drikpanchang.com/dashavatara/lord-krishna/krishna-date-of-birth.html>

Krishna was born during Dvapara Yuga out of four cyclic Yugas described in Hindu scriptures. Based on scripture details and astrological calculations the date of Krishna's birth is July 19, 3228 BCE (Mr. Saradh U) and date of Krishna's death, when Lord Krishna returned to His eternal abode of Vaikuntha, is February 18, 3102 BCE. Note: Some calculated the birth date of Sri Krishna is 21st July 3228 BCE (Mr. Arun K B), 24th June 3227 BCE (Mr. Nikhil G), 27th July 3112 BCE (Dr. D K Hari), and so on. So, you can realize that none of them knew the formula of the Hindu Calendar.

In 1991, Dr. D. Abhayankar and Dr. Ballabh of the Osmania University calculated that the present Kali Yuga began on 7th February, 3104 B.C. But it is now well accepted by the both Eastern and the Western scholars that the present Kali Yuga began on the midnight of 17th and 18th February, 3102 B.C. And hence it can roughly be said that the Mahabharata War took place nearly 5000 years ago from now.

Let's calculate 48079374 HSM from Satya Yuga, because the Birth date of Sri Krishna (19th or 20th, or 21st July 3228 BCE) occurred between 3234 BCE and 3174 BCE.

HSM (Hindu Synodic Month) = 29.5309973 days is used.

48079374 Hindu Synodic Months = 48079374 X 29.5309973 days = 1,419,831,864 days are completed from 6 AM on 19th Feb., 3890521 BCE (Sat.) to 6 AM on 3rd Dec., 3234 BCE (Tue.).

Year	Month	Day	Hours	Minutes	Sec.	DW	Hindu Month
3890521 BCE	Feb.	19	06	00	00	Sat.	(a)
3234 BCE	Dec.	03	06	00	00	Tue.	(b)

Let's calculate for 1,419,831,864 days from Satya Yuga (19th Feb., 3890521 BCE) to 3rd Dec., 3234 BCE:

From 19th Feb., 3890521 BCE to 31st Dec., 3890521 BCE = 0,000,000,316 days

From 31st Dec., 3890521 BCE to 31st Dec., 3237 BCE (3887284 Years) 1,419,830,481 days

From 31st Dec., 3237 BCE to 31st Dec., 3235 BCE = 0,000,000,730 days

From 31st Dec., 3235 BCE to 3rd Dec., 3234 BCE = 0,000,000,337 days

From 6 AM on 19th Feb., 3890521 BCE to 6 AM on 3rd Dec., 3234 BCE 1,419,831,864 days

So, 1,419,831,864 days (Or 48,079,374 HSM) are there from Satya Yuga to the end of the 64,797th 60 - Year Cycle. Therefore, 64798th Prabhava began at 6 hours on 3rd Dec., 3234 BCE (See 339th p).

1,419,831,864 days are completed between (a) and (b) because zero residue is remaining at the end of each Cycle, because HSM is suitable to get accurate nights (12 hours per night on the Equator) and days (12 hours per day on the Equator). NASA's/IAU's Synodic Month is not suitable (See 339th page).

Research: It is impossible to confirm any Historical date (Event) written in any Religious Book without proving the beginning of two consecutive 60 - Year Luni Solar Cycle. I have given those 2 Cycles, one at 48079374 HSM in 3234 BCE and the second at 48078632 HSM in 3174 BCE. So, Eastern and Western scholars have been misleading Hindus with fake calculations to this very day.

Let's calculate 48079374 NSM from Satya Yuga, because the Birth date of Sri Krishna occurred between 3234 BCE and 3174 BCE.

NSM (NASA's Synodic Month) = 29.53058885 days is used.

48079374 NASA's Synodic Months = 48079374 NSM X 29.53058885 days = 1,419,812,225.76 days = 1,419,812,225 days, 18 hrs., and 14 minutes, and 24 sec..

Calculate from Satya Yuga (21st Dec., 3890468 BCE) to 28th Dec., 3234 BCE.

From 21st Dec., 3890468 BCE to 31st Dec., 3890465 BCE = 0,000,001,106 days

From 31st Dec., 3890465 BCE to 31st Dec., 3237 BCE = 1,419,810,027 days
(3887228 Years X 365.25)

From 31st Dec., 3237 BCE to 31st Dec., 3235 BCE = 0,000,000,730 days

From 31st Dec., 3235 BCE to 28th Dec., 3234 BCE = 0,000,000,362 days

From 21st Dec., 3890468 BCE to 28th Dec., 3234 BCE = 1,419,812,225 days

1,419,812,225 days = From 21st Dec., 3890468 BCE to 28th Dec., 3234 BCE.

1,419,812,225 days are there between (1) and (2). Let's add 18 hours, 14 minutes, and 24 seconds to (2) to get the end of 48079374th NSM.

Year	Month	Day	H	M	S	NSM	Case
3890468 BCE	Dec.	21	03	26	27	0	(1)

ok			18	14	24		
3234 BCE	Dec.	28	21	40	51	48079374	(3)

Research: 1,419,812,225.76 days (Or 48,079,374 NSM) are there from Satya Yuga to the end of the 64,797th 60-Year Cycle. Therefore, the 64798th Prabhava began at 21 hours, 40 minutes, 51 seconds on December 28, 3234 BCE (Sat.). It is impossible to confirm any Historical date written in any Religious Book without proving the beginning of two consecutive 60-year luni-solar cycles (See 339th page).

METHOD-2: NASA's 60 - YEAR LUNI SOLAR CYCLE

NASA's Synodic Month is 29.53058885 days. NTY is obtained as 365.1949488 days.

Calculated from 12h, 48m, 3s on 29th Mar., CE 1987 UT or from 0 NSM.

The Jewish Messiah was Crucified on Monday at 9 AM on 29th June CE 33.

DATE OF BIRTH OF LORD RAMA, LORD KRISHNA, LORD JESUS CHRIST AND THE DEATH OF LORD KRISHNA AND LORD JESUS

METHOD-1: HINDU 60 - YEAR LUNI SOLAR CYCLE

Hindu Synodic Month is 29.5309973 days. Hindu Tropical Year is obtained as 365.2 days from the 60 - Year Cycle.

Calculated from 6 hours on 30th Mar., CE 1987 or 0 HSM at 82.5°E, Mirzapur, IST.

The Jewish Messiah was Crucified on Monday at 9 AM on CE 33.

48079477	99	Research: 24th June 3227 BCE is the Sukla Paksha Chaviti of Kaartika Month, but Mr. Nikhil Gupta calculated that Lord Krishna was born on Shrimukha Shrivana Dark 8th day, just after midnight, Rohini Nakshatra (24th June 3227 BC). So, it was observed that all so-called geniuses have been misleading Hindus with inaccurate calculations. Please note that Hindus should not use NASA's or IAU's Synodic Month (29.53058885 days) because NASA was established in CE 1958. So-called geniuses didn't realize that the 30-Year Luni Solar Cycle = The 60 - Year Luni Solar Cycle to this very day. Moreover, these so-called geniuses didn't realize that the Hindu Synodic Month takes 29.5309973 days and the Hindu Tropical year takes 365.2 days.

According to some scholars, Krishna was born on Wednesday, the eighth day of second fortnight in Shravana month in the year of Visvavasu around 3227 BC, also known as Dwapur Yug. July 19th 3228 BC to be more accurate. He lived for 125 years and disappeared on February 18th 3102 BC on the new moon night of Phalgun. His death was the onset of the current corrupt age known as Kaliyug.

Research: According to NASA's 60 - Year Luni Solar Cycle, 24th June 3227 BCE is the Sukla Paksha Ashtami of Bhadrapad Month but Mr. Nikhil Gupta calculated that Lord Krishna was born on Shrimukha Shravana Dark 8th day, just after midnight, Rohini Nakshatra (24th June 3227 BC). Please see how the Astrologers, Panchang writers and so-called geniuses have been misleading Hindus with their inaccurate Calculations to this very day because Engineers, Mathematicians, and all well-educated people didn't know the basics of Hindu Astronomy and Astronomy. Moreover, the Hindu Calendar based on the 60 - Year Cycle has not been giving accurate Phases of the Moon, accurate Seasons, and accurate Ugadi. For the evidence, see the 1283rd page under " THE DISCOVERIES OF ASTRONOMERS (NASA OR IAU ETC.) HAVE BEEN MISLEADING THE WORLD - 1" on www.yhwhcalendar49.com. The discoveries (Synodic Month with 29.53058885 days and Tropical Year with 365.2422 days) of the Astronomers of IAU and NASA are inaccurate forever. So, an accurate Calendar formula proves the actual Creator. The calculations of Mr. Sarath Upadhyay, Dr. Nilesh Nilkanth Oak's (NNO's), Sri Pushkar Bhatnagar, and so on are based on 29.53058885 days. So, don't believe in their calculations. For a piece of evidence, please study under "CHALLENGE", under "Hindu Calendar has been misleading Hindus (About 1500 BCE to CE 2136)" under HINDU ASTRONOMY and under "Hindu Puzzle Solved by Me (4234 BCE to CE 2137)" on www.yhwhcalendar49.com. "Bhogi, Sankranti, Kanuma, and Mukkanuma Festivals" should not occur in January because the Hindu Tropical Year (365.2 days) is not equal to the Gregorian Tropical Year (365.2425 days). Please note that the Synodic Month with 29.53058885 days (Discovered by IAU/NASA) is not suitable in terms of Luni Solar Cycle, and the Tropical Year with 365.2422 days is not suitable in terms of the Tropical Cycle. Please note that the Tropical Year with 365.2425 days is suitable to get accurate nights (12 hours per Night) and accurate days (12 hours per day), but not useful to get accurate Seasons because of the Gregorian Synodic Month with 29.55036408 days (Not suitable to get accurate Phases of the Moon and Seasons).

48080859	1	According to Dr. D K Hari, Sri Krishna's birth date is 27th July 3112 BCE. Let's calculate the end of the 48080878th Hindu Synodic Month from Satya Yuga. HSM (Hindu Synodic Month) = 29.5309973 days is used. 48,080,878 Hindu Synodic Months = 48080878 HSM X 29.5309973 days = 1,419,876,279.38 days = 1,419,876,279 days, 9 hours, 7 minutes, and 12 seconds. 1,419,876,279 days are completed from 6 AM on 19th Feb., 3890521 BCE (Sat.) to 6 AM on 10th July 3112 BCE (Tue). DATE OF BIRTH OF LORD RAMA, LORD KRISHNA, LORD JESUS CHRIST AND THE DEATH OF LORD KRISHNA AND LORD JESUS

METHOD-1: HINDU 60 - YEAR LUNI SOLAR CYCLE

Hindu Synodic Month is 29.5309973 days. Hindu Tropical Year is obtained as 365.2 days from the 60 - Year Cycle.

Calculated from 6 hours on 30th Mar., CE 1987 or 0 HSM at 82.5°E, Mirzapur, IST.

The Jewish Messiah was Crucified on Monday at 9 AM on CE 33.

48080917	59	Therefore, the calculations of Dr. Veda Vyasa are not accurate. It is impossible to confirm any Historical date (Event) written in any Religious Book without proving the beginning of two consecutive 60-year luni solar cycles. All these calculations are so simple that you too can calculate like me using the formula of the Hindu Calendar (60-year Luni-Solar Cycle). It was observed that the Hindus should not use NASA's Synodic Month or IAU's Synodic Month (29.53058885 days), and Jews should not use NASA's Synodic Month or IAU's Synodic Month (29.53058885 days) because NASA was established on 29th July CE 1958 and IAU was established on 28th July CE 1919. GMT was introduced in CE 1884. UT was introduced in 1928. The day began at 12 PM was introduced in CE 1925. And UTC was introduced in CE 1972. So, Hindus should use their Hindu Synodic Month with 29.5309973 and Bhogi, Sankranti, and Kanuma festivals should Not be celebrated in the Month of January because Hindu Tropical Year takes 365.2 days but not 365.2425 days.

Calculated from 12h, 48m, 3s on 29th Mar., CE 1987 UT or from 0 NSM.

The Jewish Messiah was Crucified on Monday at 9 AM on 29th June CE 33.

Let's calculate the end of 48080959 NSM because because According to Dr. Veda Vyasa, IAS, Ph.D, Kali Yuga started at 2 hr. 27 m. 30 sec. on 20 Feb. 3105 B. C.

NSM (NASA's Synodic Month) = 29.53058885 days used.

48080959 NASA's Synodic Months = 48080959 NSM X 29.53058885 days = 1,419,859,032.26 days = 1,419,859,032 days, 06 hours, 14 min., and 24 sec.
Calculate from Satya Yuga (21st Dec., 3890468 BCE) to 21st Feb., 3105 BCE:
From 21st Dec., 3890468 BCE to 31st Dec., 3890465 BCE = 0,000,001,106 days
From 31st Dec., 3890465 BCE to 31st Dec., 3109 BCE = 1,419,856,779 days
(3887356 Years X 365.25)
From 31st Dec., 3109 BCE to 31st Dec., 3106 BCE = 0,000,001,095 days
From 31st Dec., 3106 BCE to 21st Feb., 3105 BCE = 0,000,000,052 days
From 21st Dec., 3890468 BCE to 21st Feb., 3105 BCE = 1,419,859,032 days
1,419,859,032 days are completed between (1) and (2). Add the residue (06 hrs., 14 min. and 24 sec.) to (2) to get the end of 48080959th NSM

Research Again: In 1991, Dr. D. Abhayankar and Dr. Ballabh of Osmania University calculated that the present Kali Yuga began on 7th February, 3104 B.C. It was proven that Dr. D Abhayankar and Dr. Ballabh miscalculated the date of Kali Yuga. Astronomers didn't realize that their discoveries were not accurate. So, Yahweh's Synodic Month and Yahweh's Tropical Year are 100% accurate.										
Research Again: Judaism is written in Yahweh's Book, which recorded history from the date of the Creation of the Sun, Moon, and stars (23rd Feb., 4234 BCE, from 35°E) to CE 100. Yahweh's Book recorded His calendar formula as 49 Years (Leviticus 25:8-9). Please study under "Jewish History and YHWH's Formula" on www.yhwhcalendar49.com . So, don't believe that NASA data is genuine.

Calculated from 6 hours on 30th Mar., CE 1987 or 0 HSM at 82.5°E, Mirzapur, IST.

48080997	139	Let's calculate the end of the 48080996th Hindu Synodic Month from Satya Yuga because Sri Sharad Upadhyay calculated that "KALI YUGA" began on 18th February 3102 BCE. HSM (Hindu Synodic Month) = 29.5309973 days is used. 48080996 Hindu Synodic Months = 48080996 HSM X 29.5309973 days = 1,419,879,763.28 days = 1419879763 days, 06 hours, 43 minutes, and 12 seconds. 1,419,879,763 days are completed from 6 AM on 19th Feb., 3890521 BCE (Sat.) to 6 AM on 23rd Jan., 3102 BCE (Sun.). Add the residue (6 hours, 43 min., and 12 sec., to (b) to get the end of 48080996 HSM. <table><thead><tr><th>Year</th><th>Month</th><th>Day</th><th>Hours</th><th>Minutes</th><th>Sec.</th><th>DW</th><th>Month</th></tr></thead><tbody><tr><td>3890521 BCE</td><td>Feb.</td><td>19</td><td>06</td><td>00</td><td>00</td><td></td><td>(a)</td></tr><tr><td>3102 BCE</td><td>Jan.</td><td>23</td><td>06</td><td>00</td><td>00</td><td></td><td>(b)</td></tr><tr><td></td><td></td><td></td><td>+ 06</td><td>+ 43</td><td>12</td><td></td><td></td></tr><tr><td>3102 BCE</td><td>Jan.</td><td>23</td><td>12</td><td>43</td><td>12</td><td>Sun.</td><td>Vaisakh (c)</td></tr></tbody></table> Research: 24th Jan., 3102 BCE is the Phadyami of Jyestam. METHOD-2: NASA's 60 - YEAR LUNI SOLAR CYCLE

NASA's Synodic Month is 29.53058885 days. NTY is obtained as 365.1949488 days.

Calculated from 12h, 48m, 3s on 29th Mar., CE 1987 UT or from 0 NSM.

The Jewish Messiah was Crucified on Monday at 9 AM on 29th June CE 33.

NSM (Satya Yuga)	N 742	Cycles	Year	M	D	H	M	S	DW	Days
0	0	0	3890468 BCE	Dec.	21	03	26	27	Sun.	0
48080997	Let's calculate the end of the 48080996th NASA's Synodic Month because "KALI YUGA" began on 18th Feb., 3102 BCE.									
48080998	NSM (NASA's Synodic Month) = 29.53058885 days used.									
48080999	48,080,996 NASA's Synodic Months = 48080996 NSM X 29.53058885 days = 1,419,860,124.37									
48081000	days = 1419860124 days, 8 hours, 52 minutes, and 48 seconds. Calculate from Satya Yuga (21st									
48081001	Dec., 3890468 BCE) to 17th Feb., 3102 BCE:									
48081002	From 21st Dec., 3890468 BCE to 31st Dec., 3890465 BCE = 0,000,001,106 days									
48081003	From 31st Dec., 3890465 BCE to 31st Dec., 3105 BCE (3887360 Years X 365.25) = 1,419,858,240 days									
48081004	From 31st Dec., 3105 BCE to 17th Feb., 3102 BCE = 0,000,000,778 days									
48081005	From 21st Dec., 3890468 BCE to 17th Feb., BCE 3102 = 1,419,860,124 days									
48081006	According to Method - 2: 1,419,860,124 days are completed between (1), and (2). Satya Yuga began at (1).

48081010	Add 8 hours, 52 minutes, and 48 sec., to (2) to get end of 48080996th NSM.

48081015	Research: 48080996 NSM (NASA's Synodic Month) is completed at (3).									
48081016	According to Method - 2, Kali Yuga began at (3). So-called geniuses used									
48081017	the IAU's/NASA's Synodic Month with 29.53058885 days. What is the									
48081018	necessity to use NASA's Synodic Month with 29.53058885 days instead									
48081019	of the Hindu Synodic Month with 29.5309973 days?									
48081020	Research Again: According to Method - 1, 18th Feb., 3102 BCE is the									
48081021	Krishna Paksha Dwadasi of Jyestha month. According to Method - 2, 18th									
48081022	Feb., 3102 BCE is the Sukla paksha Phadyami of Jyestha Month.									
48081023	Therefore, So-called geniuses like Sri Saradh Upadhyay, Dr. Veda Vyasa,									
48081024	IAS, Phd, and so on didn't know that each Hindu 60 - Year Luni Solar									
48081025	Cycle begins at 6 hours (6 AM) as soon as 60 Hindu Luni Solar Years are									
48081026	completed. Moreover, they didn't know the basics of the Hindu Calendar									
48081027	Formula. So, this is the time to learn from our website to do calculations									
48081028	of the Four Yugas and any historical event. What is the necessity to use									
48081029	NASA SOFTWARE and NASA's Synodic Month (29.53058885 days). Hindu

https://www.researchgate.net/publication/357505218_The_Scientific_Dating_of_the_Mahabharat_War: Mr. G.S. Sampath Iyengar and Mr. G.S. Sheshagiri have fixed the birth-date of Krishna as 27th July 3112 BC.

<https://www.patheos.com/blogs/drishtikone/2010/09/astronomical-proof-mahabharata-war-shri-krishna/>

According to some scholars, Krishna was born on Wednesday, the eighth day of second fortnight in Sravana month in the year of Visvavasu around 3227 BC, also known as Dwapur Yuga. July 19th 3228 BC to be more accurate. He lived for 125 years and disappeared on February 18th 3102 BC on the new moon night of Phalgun. His death was the onset of the current corrupt age known as Kaliyug.

Let's calculate 48081600 HSM from Satya Yuga, because "Kali Yuga" began in 3054 BCE. According to the Hindu Calendar Formula, Kali Yuga occurred in 3054 BCE.

NSM (NASA's Synodic Month) = 29.53058885 days is used.

48081600 NASA's Synodic Months = 48081600 X 29.53058885 days = 1,419,877,960.85 days. 1,419,877,960 days, 20 hours and 24 minutes.

From 21st Dec., 3890468 BCE to 31st Dec., 3890465 BCE = 0,000,001,106 days
From 31st Dec., 3890465 BCE to 31st Dec., 3057 BCE = 1,419,875,772 days
(3887408 Years X 365.25)
From 31st Dec., 3057 BCE to 31st Dec., 3055 BCE = 0,000,000,730 days
From 31st Dec., 3055 BCE to 28th Dec., 3054 BCE = 0,000,000,352 days
From 21st Dec., 3890468 BCE to 18th Dec., 3054 BCE = 1,419,877,960 days

Therefore, 64801st Prabhava began at (b) or at 6 hours on 24th Nov., 3054 BCE. Research Again: (1) How can the Kali Yuga begin in 3102 BCE or 3105 BCE, or 3112 BCE if the 60 - Year Luni Solar Cycle began (Prabhava began) on 6 hours on 30th March AD/CE 1987? (2). Did the Satya Yuga begin at 6 hours (6 AM) or not? (3). Did the Treta Yuga, and the Dwapara Yuga begin after the end of the 60 - Year Luni Solar Cycle? (3). Please prove your calculations from Sataya Yuga or Treta Yuga or Dwapara Yuga, or Kali Yuga to confirm the beginning of Prabhava in AD/CE 1987? (4). How long is a Hindu Synodic Month (29.5309973 days or 29.53058885 days) and a Hindu Tropical Year (365.2 days or 365.2425 days)? (5). Prove the formula of the Hindu 60 - Year Luni Solar Cycle. Then we can believe your calculations.
